

G4UserTrackingAction

```
classDiagram
    class G4UserTrackingAction
    class MMTrackingAction {
        - fName
        - fEventAction
        + MMTrackingAction()
        + ~MMTrackingAction()
        + PreUserTrackingAction()
    }
    MMTrackingAction <|-- G4UserTrackingAction
```

The diagram illustrates a class hierarchy. At the top is the 'G4UserTrackingAction' class, represented by a rectangle with three empty compartments. Below it is the 'MMTrackingAction' class, represented by a rectangle with three compartments: the top for the class name, the middle for private attributes, and the bottom for public methods. A blue arrow with an open triangular head points from the 'MMTrackingAction' class to the 'G4UserTrackingAction' class, indicating that 'G4UserTrackingAction' inherits from 'MMTrackingAction'.

MMTrackingAction

- fName
- fEventAction

+ MMTrackingAction()
+ ~MMTrackingAction()
+ PreUserTrackingAction()
